Company – Key Facts

- Specialist in ultrasonic technologies since 1991
- Approximately 100 employees
- ▼ Headquarters in Halle (Saale), Germany
- ✓ US subsidiary SONOTEC Inc. founded 2013 in New York

- Integration of R&D and manufacturing
- 4 product ranges (medical, process measurement, maintenance and NDT)
- Quality and innovation leadership philosophy
- ✓ ISO 9001, ISO 13485 and ATEX certified

Development – Considerations

- Increase of testing reliability
- Decrease of testing time
- Ruggedness for extreme testing environments

- Convenient and easy operation
- Testing of weld seams, castings, forgings, sheet metals, etc.
- ▼ Testing of plastics/composites

Features – Operating Concept

- Developed with experienced testers
- Highly user-oriented focus
- Menu navigation by turning and pressing of hand wheels

Stor Distar Manage probes

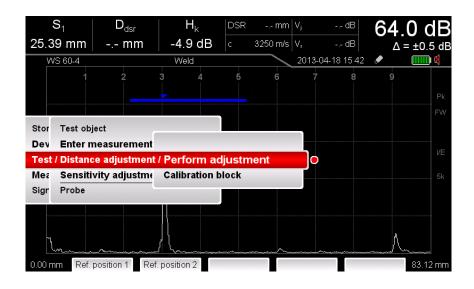

Dev Sensi

Test / Probe / Select probe

Mea Test Probe settings

Sigr Enter Create new probe

- Intuitive menu structure in full text
- Tester is quickly guided through all pretest configurations
- DAC single point modification

Features - Display

- Large 8" color TFT screen
- ▼ Very high resolution (800 x 480 pixels)
- Measuring range of 10m can be displayed in one A-scan

- Perfect readability during all lighting conditions (6 different color schemes)
- Configurable display of up to 10 readings
- All probe settings are displayed at a glance

Features - Design

- ▼ High qualitative device "Made in Germany"
- Integration of R&D, design, electronic manufacturing and mechanical production
- -20° C to 60° C operating temperature range
- ✓ Very robust one piece aluminum body with additional rubber protection
- Protection class: IP66
- Modern but highly functional

Contact

Features – Technical Performance

- Meets DIN EN12668-1, ASTM E1324
- 2 GB internal data storage
- Battery operating time up to 13 hours
- Powerful square wave pulser (up to 400V)

- ▼ Measurement range up to 20m
- High resolution (5ns) up to a measurement range of 10m
- PRF automatic or up to 10kHz
- Frequency filter options

Features

Features – Functionality

- DAC (+ TCG), DGS and AWS evaluation methods
- Envelope and reference echo function
- Flash drive for external storage and transfer via USB

- Integrated material, probe and calibration block database
- Testing protocol with all measurement values and screenshot
- Protection and working case

Features – Service

- Medium sized company
- ▼ Integration of R&D, production and sales
- Fast reaction time and high flexibility

- ▼ Short lead times due to permanent stock
- Realization of customer specific solutions
- Local support from qualified partners

Probes - SONOSCAN

- Made in Germany
- ▼ EN 12668-2 certified
- Highest sensitivity and precision
- ▼ Modern and ergonomic design

- Full range of angle, straight and immersion probes
- Customized solutions
- Independent production of ceramics and composites

W/Thickness - SONOWALL

- ▼ Wall thickness measurement
- Devices for different materials
- Measurement through corrosion
- Coatings/painting layers can be ignored

- Special probes for round surfaces (pipes)
- Device for explosive areas available
- High accuracy and easy operation
- Multi-echo or sender/receiver devices

Pipeline - SONOPIPE

- ▼ Non-intrusive detection of pipeline pigs
- Recognition of different product types
- Analysis of product characteristics
- High accuracy even for coated or painted pipelines

- Measurement through the wall
- Maintenance free, no wear and tear parts
- Easy installation, no process interruption
- Suited for explosive areas (ATEX) and extreme conditions (up to IP68)

Maintenance – SONAPHONE

- Accurate detection of leakages in compressed air, gas or vacuum systems
- Internal performance control of valves, steam traps and other fittings
- Detection of partial discharges or corona

- Preventive maintenance machine diagnostics (bearing inspection)
- ► High energy cost savings can be achieved easily
- Increased operating safety
